-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 August 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 97-131 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 97-131 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed August 26, 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. The foreign patent documents and non-patent literature publications referred to therein have not been considered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 97-111, 114-129 are rejected under 35 U.S.C. 103(a) as being unpatentable over D'Agostino (US 5,606,496) in view of Smith (US 5,450,123), and further in view of Dagdeviren et al. (US 5,371,534, hereinafter "Dagdeviren"), and further in view of Grady et al. (US 5,712,906, hereinafter "Grady").

D'Agostino discloses a commercial transaction communication system (Fig. 1) for selectively enabling video communications through a communication system (telephone network; col. 7, lines 29-40) between

members of plural groups (customer terminals 14 and representative terminals 12), comprising:

video display systems (customer terminal 14 in Fig. 2A; representative terminal 12 in Fig. 2B; the customer terminal capable of operating in a video image display mode or a menu display mode (col. 6, lines 49-56);

an interconnect system (telephone system including communication links 16, 18) adapted to selectively electronically couple the video display terminals (customer terminal is selectively coupled to the appropriate representative terminal) through the communication system on the basis of stored information (preset numbers are stored which correspond with different financial services; col. 4, lines 21-29) and buyer input (desired financial service is selected by the customer depressing the appropriate button (col. 4, lines 24-29) and to permit the exchange of commercial transaction data (credit card payment data; col. 7, lines 4-6, 65-67); and

a video format switch (the representative uses an input device 46 to effect either a compatible video image display or a menu display; col. 6, lines 47-56).

D'Agostino differs from claims 97-129 in that although it provides for transmitting a video image of the representative, it does not specify communicating a dynamic, full-motion video. However, Smith teaches the desirability of including a camera so that direct, real-time, point-to-point video communication can take place between a customer and the representative (col. 3, lines 26-27; col. 4, lines 25-28; moving pictures are communicated via AT&T

2500 video telephone sets, col. 1, lines 27-28) such that it would have been obvious to an artisan of ordinary skill to incorporate such dynamic, full-motion video communication, as taught by Smith, within the system of D'Agostino in order to provide a real-time video as well as audio communication between the customer and representative. In this way, a more realistic face-to-face meeting can take place.

D'Agostino further differs from claims 97-129 in that although it teaches alternatively providing for a single link to transmit voice and data (col. 7, lines 33-35), it does not specify alternatively involving analog or digital lines. However, Dagdeviren teaches that it is old and well known to alternately involve analog lines (voice grade trunks 111) and digital lines (ISDN data lines 112) depending on whether the call is a voice grade, audio call or a multimedia ISDN call (Abstract; col. 5, lines 53-57) such that it would have been obvious to an artisan of ordinary skill to incorporate such alternate use of analog and digital lines, as taught by Dagdeviren, within the system of D'Agostino in order to provide the appropriate bandwidth for either voice or multimedia communication.

D'Agostino further differs from claims 17 and 33 in that it does not specify text communications between the vendor and buyer. However, Grady, from the same field of endeavor, teaches the desirability of providing text communications (email) between terminals (col. 11, lines 46-47) in addition to video and multimedia communication. It would have been obvious to an

artisan of ordinary skill to provide for text communications, as taught by Grady, between the caller and agent stations of Smith in order to provide an additional means of communication.

Regarding claim 110, Smith provides for a dynamic video source and database 6.

Regarding claim 111, D'Agostino provides for a printer 28 and printer 50.

4. Claims 112-113 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of D'Agostino, Smith, Dagdeviren, and Grady as applied to claim 97 above, and further in view of Ando et al. (US 4,888,795, hereinafter "Ando").

The combination differs from claims 112-113 in that it does not specify the video being freeze-frame or high resolution. However, Ando teaches the desirability of providing the option of transmitting a single frame, high resolution video signal (such as when a text document is to be transmitted for clear viewing) or a full-motion, low resolution video signals (such as when face-to-face communication is desired) (Abstract; col. 1, line 24 - col. 3, line 35; col. 4, line 31 - col. 5, line 9; col. 7, line 39 - col. 8, line 3). It would have been obvious to an artisan of ordinary skill to incorporate the use of freeze-frame, high resolution video communication, as taught by Ando, within the combination of D'Agostino, Smith, Dagdeviren and Grady in order to allow for transmission of captured document data which requires a higher resolution than a moving image of the user's face.

5. Claims 130-131 are rejected under 35 U.S.C. 103(a) as being unpatentable over D'Agostino in view of Smith, Dagdeviren, and Grady, as applied to claim 97 above, and further in view of Donald et al. (US 5,053,956, hereinafter "Donald").

The combination of D'Agostino, Smith, Dagdeviren, and Grady differs from claims 130-131 in that although it provides for displaying products to the customer (Smith, col. 2, lines 65-68), it does not specify an inventory control system. However, Donald teaches the desirability of coupling an interactive video display system with an inventory control system (col. 7, lines 3-9; col. 9, line 61 - col. 10, line 4) so that a customer can view products along with the number available in stock such that it would have been obvious to an artisan of ordinary skill to incorporate such coupling with an inventory control system, as taught by Donald, within the combination of D'Agostino, Smith, Dagdeviren, and Grady so that the customer can be apprised of availability while the seller's inventory database is kept current as items are purchased.

Response to Arguments

6. Applicant's arguments filed August 2, 2005 have been fully considered but they are not persuasive.

In response to applicant's argument that there is no explicit suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or

motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, each the applied references relate to communications over the telephone network and teach features which are well known to be desirable in the telephony art to one of ordinary skill.

Applicant argues that there appears to be no vendor selection based on commercial transaction data. However, D'Agostino clearly provides for selecting a particular representative terminal (col. 7, lines 11-28) based on the type of financial service or product (commercial transaction data) selected by the customer (col. 6, lines 25-34; col. 11, line 64 – col. 12, line 9; col. 12, lines 35-60) as well as representative knowledgeability (col. 6, lines 37-39).

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on

the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stella L. Woo whose telephone number is (571) 272-7512. The examiner can normally be reached on Monday-Tuesday, Thursday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curtis Kuntz can be reached on (571) 272-7499. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
